**ROCKSOLID UPDATE**

# Nidagravel - stabilising the nation.....

Welcome to the latest issue of ROCK-SOLID UPDATE, the newsletter from Rocksolid Ground Solutions, UK agent for Nidagravel, the gravel stabilisation system that is taking the nation by storm.

Nidagravel stabilisation trays are rapidly becoming the system of choice for an enormous amount of people who want to say goodbye to problem gravel for good.

## What makes them so successful?

This is a question being asked by many customers, landscapers and industry gurus alike; the answer is simple; they have been conceived designed and manufactured to do just one thing; stabilise gravel, invisibly. Just take a look at their credentials;

- Thin sidewalls making the product virtually undetectable
- 37mm hexagonal compartments resulting in excellent compaction of gravel
- Membrane attached to the base, keeps the gravel in place and inhibits weeds

- Made from polypropylene means resistant to acids, alkalines, oils, in fact virtually everything (the reason why the chemical industry use polypropylene for chemical storage)
  - 1.2m x 1.2m sheet size are quick and efficient to install
- So what are you waiting for? ...Happy Installing.

## A Demo sells it every time

It's a fact that is being proven time and time again up and down the country; a demonstration of the Nidagravel system sells it every time. It seems that as soon as prospective customers see the incredible stability of the gravel in the trays and the sheer simplicity of the system, they are hooked and they want it.

In fact we have received a lot of feedback from our preferred contractors across the country when they take their filled sample trays of Nidagravel to show customers, their customers are doing more than just looking. We have had reports of high heeled shoes testing the samples, pushchairs, bikes, cars and in one of the most extreme cases a fork lift truck. In every test carried out we are pleased to report that the product passed with flying colours and the vast majority have

resulted in orders for drives, car parks and paths.

### Quick snippets

- We have over 40 preferred installers across the west of the UK from Cumbria to Cornwall
- Over 60,000 sq metres of Nidagravel has been installed in the UK to date
- For a perfect finish, edge the Nidagravel with Permaloc Aluminium Edging see over...

**We're on the web**  
**[www.itsrocksolid.co.uk](http://www.itsrocksolid.co.uk)**

Each issue we will be running a spotlight feature on a preferred installer who has recently completed a Nidagravel installation. In this issue we are featuring Creative Garden Solutions based in Stockport, Cheshire. Dave Hadley, Creative Garden Solutions' proprietor applied to become a preferred installer towards the end of 2006 and a short time later at the beginning of 2007 he won his first Nidagravel job. The job which included a wide range of landscaping work had at its hub a 300m<sup>2</sup>+ driveway of Nidagravel. Dave used original rope top edgings to edge the drive and 10mm golden gravel to give it that quality feel. Creative Garden Solutions are already established on the Marshalls register and Dave and his team are always in demand for their wide ranging skills and attention to detail that they bring to a project. As soon as the installation was complete Dave was on the phone telling us how pleased both he & his customer were and how he was looking forward to installing many more Nidagravel drives....

**"Great product! We laid 300 square meters easily in a morning.**

**Nidaplast gives simple yet very high class solution to the problems associated with gravel drives.**

**The customer was delighted, her 4X4 could be parked on the finished drive at the end of the day with no tyre marks at all. "**

Creative Garden Solutions can be contacted via their website

**If you have got a recent installation and would like to be featured here drop us a line at [info@itsrocksolid.co.uk](mailto:info@itsrocksolid.co.uk)**

### Permaloc - the edge of reason...

For an edging system that's as straight forward and cost effective as Nidagravel to install try; Permaloc Aluminium Edging, manufactured in the U.S.A. and distributed by Rocksolid Ground Solutions in the UK. Permaloc edging is supplied in lengths of 2.44 metres and can be cut easily, joined together and bent to form curves or right angles.

There are 2 Permaloc products that do a first class job of edging your Nidagravel;

- Permastrip – Ideal for edging garden paths as well as lawns and beds. Specification; 'L' shaped profile, height 89mm, supplied with aluminium stakes and joining strips. Available in Mill (plain aluminium) or black.
- Asphalt Edge – Ideal for edging drives. Specification; 'L' shaped profile, various heights available and everything from 2.5 inch (63.5mm) upwards is suitable for Nidagravel, secured with large galvanised driving nails through the foot of the product. Available in mill (plain aluminium) only in the UK.

*Contemporary edging for a quality finish*

### New Preferred Installer Logo

We are delighted to announce the launch of our new Preferred Installer Logo to identify all Nidagravel preferred installers.

The logo as shown here is for use by official preferred installers of Nidagravel to help customers recognise them and to add status to their business.

It can be displayed on letter heads, business cards, websites, vehicles and work wear. Use it with pride and let people know your business is one of the select group of preferred installers, able to install Nidagravel drives, car parks and pathways. Preferred installers who would like a JPEG file format version of the logo; just email us at [info@itsrocksolid.co.uk](mailto:info@itsrocksolid.co.uk) and we will send it straight back to you.
